The "futureshape" exercise system offers a truly revolutionary way to gently tone and firm the entire body, without the muscle strain and fatigue the accompanies traditional types of exercise.

Through a unique combination of physical and isometric high-reputation movements, these six individual machines firm, tone, and reduce different areas of the body. The increased oxygen supply and improved circulation helps to break down stubborn cellulite. One will see results almost immediately with this gentle effective system. Low maintenance, full training and support are benefits of "futureshape", the gentle art of slimming.
